The free expansion pack for Red Alert 2

Yuri's Revenge is a fan-made fan patch. It adds an additional mission, eight new weapons, a map, and some other minor changes. This is a high-quality and polished patch with lots of custom-made content. The expansion pack includes: Additional mission: The time has come for Yuri's Revenge to return. It's time for Red Alert 2 Yuri's Revenge to strike, to remind the world of Yuri's existence, of his great victory over the Americans, and of his intention to start another war. New weapons: Eight new weapons have been added, including the new Destroyer Missile Launcher and the Anti-Missile Rocket Launcher. New map: The Dead City is a larger and more detailed version of the original Yuri's Revenge map. Minor tweaks to existing maps: The overall look of the maps have been improved. Several names have been changed and the objects have been redrawn. The new map is an exact mirror of the original Yuri's Revenge map. Two new vehicles have been added, including the new T-72. New units: Eight new units, including the ATAC, SFP, and ASN-161, have been added to the game. Additional sounds: Sound effects and music has been improved. Cheat codes: Most of the game's cheats have been added. The requirements are pretty minimal; I can only assume that anyone who has a mod of the original game can download it, because no source code was provided. It's not a big, bloated download, however. The community is doing a lot of work on Yuri's Revenge, so there's no doubt that this patch is

useful. Even if you're not interested in Yuri's Revenge, the patch should still be fun to play. Even if you want to make your own patches, you should read the following points about Yuri's Revenge: This is a patched version of the original Red Alert 2 Yuri's Revenge. The expansion pack, however, is not patched, 82157476af
